

Grid Dynamics Earns MACH Alliance's 2026 Agent Ready Award for Production-Scale Agentic AI

Key Takeaways:

- Grid Dynamics is named to MACH Alliance's inaugural 2026 Agent Ready cohort.
- Grid Dynamics won the award for its agentic AI capabilities and for programs delivered at a global food and beverage company and a global payments company.
- Grid Dynamics delivered the qualifying work through its Grid Dynamics AI Native (GAIN) platforms and Forward Deployed Engineer delivery model.

SAN RAMON, CA, August 19, 2026 – [Grid Dynamics](#) Holdings, Inc. (Nasdaq: GDYN) (“Grid Dynamics”), a premier AI transformation partner for the Fortune 1000, today announced it has earned MACH Alliance's [2026 Agent Ready Award](#), becoming one of 35 companies named in the program's inaugural cohort.

Agent Ready is an advanced certification that builds upon MACH Certification, the MACH Alliance's baseline standard for open, composable, and connected technology. The honor recognizes certified members that have moved agentic AI from pilots and demos into production, at scale, with the guardrails enterprise deployment requires. Every award is independently reviewed by MACH Alliance, the vendor-neutral authority on scaling production-ready enterprise AI without vendor lock-in.

For companies like Grid Dynamics, Agent Ready criteria evaluate organizational readiness at scale: named leadership, market presence, published thought leadership and production delivery. Grid Dynamics met that bar with agentic AI programs built and delivered for enterprise clients, including a multi-agent commerce program for a global food and beverage company and a multi-agent transformation for a global payments company. Both programs run in production today, built on Grid Dynamics AI Native (GAIN) platforms and delivered through its Forward Deployed Engineer model, which embeds Grid Dynamics engineers directly inside client teams.

"Grid Dynamics met a high bar for systems integrators: named leadership, market presence, and production delivery of agentic AI at enterprise scale," said Holly Hall, Managing Director of MACH Alliance. "That's exactly the organizational readiness Agent Ready was built to recognize."

"Being named Agent Ready 2026 confirms what we're already seeing with clients: the market has moved past agentic pilots and is demanding agents that run in production, at scale, with real guardrails," said Achilles Chalkiotis, VP, Global Head of Digital Engagement at Grid Dynamics. "This recognition is independent validation of work we're already doing with clients."

About MACH Alliance

The MACH Alliance is the global, vendor-neutral industry body setting the standards for open, composable, and connected enterprise technology. It's a movement equipping technology leaders with certifications, research, and peer guidance to build architectures they own and can evolve. Founded in 2020, the Alliance has established the trusted framework for enterprise technology transformation and is now leading the development of one of the world's first Agent Ecosystems, an open, interoperable environment where specialized AI agents from different vendors work together through vendor-neutral standards. It counts a growing community of 100+ member companies and 80+ enterprise ambassadors, including technology vendors, system integrators, hyperscalers, and leading global brands. Forward-Looking Statements

This communication contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are not historical facts, and involve risks and uncertainties that could cause actual results of Grid Dynamics to differ materially from those expected and projected.

These forward-looking statements can be identified by the use of forward-looking terminology, including the words “believes,” “estimates,” “anticipates,” “expects,” “intends,” “plans,” “may,” “will,” “potential,” “projects,” “predicts,” “continue,” or “should,” or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include, without limitation, quotations and statements regarding the expected benefits of our capabilities and our company’s future growth including with customers and partners. Most of these factors are outside Grid Dynamics’ control and are difficult to predict. Factors that may cause such differences include, but are not limited to, our ability to achieve expected benefits, any factors limiting our capabilities, the benefits of our services and products, and our company’s growth strategy.

Grid Dynamics cautions that the foregoing list of factors is not exclusive. Grid Dynamics cautions readers not to place undue reliance upon any forward-looking statements, which speak only as of the date made. Grid Dynamics does not undertake or accept any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to reflect any change in its expectations or any change in events, conditions or circumstances on which any such statement is based. Further information about factors that could materially affect Grid Dynamics, including its results of operations and financial condition, is set forth under the “Risk Factors” section of Grid Dynamics’ annual report on Form 10-K filed March 5, 2026, and in other periodic filings Grid Dynamics makes with the SEC.
